## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by  
Anderson, U.S. 4,832,121.

Anderson discloses a shutting in after an initial injection the formation (14) intersected by a wellbore (10), monitoring temperature with sensors (28) positioned above and within the formation, injecting a subsequent treatment as the increased temperature formation fluid enters the wellbore and monitoring movement of the injection fluid in real time (col. 5, lines 10-16). Anderson discloses logging the temperature versus depth characteristics over time as an indication of the rate increased fluid travel (col. 7, lines 26-31) downhole. Anderson discloses shutting in after an injection to determine fracture volume profile as a result of the temperature profile reaching equilibrium (col. 7, lines 43-47).
